Please use additional sheets of paper if necessary.

**CARLI Proposal
Transportation Library
Northwestern University
March, 2008**

The materials to be digitized consist of 174 reports and materials authored by the Chicago Transit Authority and the Illinois Regional Transportation Authority. This is a strong collection, especially from the 1950's through the end of the 20th century. Both the Chicago Transit Authority and the Illinois Regional Transportation Authority are without libraries so these materials are not available through the originating agencies. All of the items have been fully catalogued and have been submitted to OCLC.

This collection clearly addresses the theme "Illinois Culture and Heritage." Transportation is germane to any society and is certainly a part of Illinois' history. Illinois in general and Chicago specifically are considered the crossroads of America because of the key role that transportation has played in their histories. The digitizing of this collection of key Illinois and Chicago transportation reports and studies would make this valuable information, current and historical, available to citizens and transportation planners alike.
