## Section 1194.22 Web-based Internet

#### information and applications – Detail

# VPAT™

## Voluntary Product Accessibility Template<sup>®</sup>

| Criteria  | Supporting Features | Remarks<br>and<br>explanations |
|---|---------------------|--------------------------------|
| (a) A text equivalent for every non-<br>text element shall be provided (e.g.,<br>via "alt", "longdesc", or in element<br>content).                        | Partially           |                                |
| (b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.  | Supports            |                                |
| (c) Web pages shall be designed so<br>that all information conveyed with<br>color is also available without color,<br>for example from context or markup. | Supports            |                                |
| (d) Documents shall be organized<br>so they are readable without<br>requiring an associated style sheet.  | Supports            |                                |
| (e) Redundant text links shall be<br>provided for each active region of a<br>server-side image map.   | Supports            |                                |
| (f) Client-side image maps shall be   | N/A                 |                                |

| provided instead of server-side<br>image maps except where the<br>regions cannot be defined with an<br>available geometric shape.  |           |
|--|-----------|
| (g) Row and column headers shall be identified for data tables.  | Partially |
| (h) Markup shall be used to<br>associate data cells and header<br>cells for data tables that have two or<br>more logical levels of row or column<br>headers.   | Partially |
| (i) Frames shall be titled with text<br>that facilitates frame identification<br>and navigation  | N/A       |
| (j) Pages shall be designed to avoid<br>causing the screen to flicker with a<br>frequency greater than 2 Hz and<br>lower than 55 Hz.   | N/A       |
| (k) A text-only page, with equivalent<br>information or functionality, shall be<br>provided to make a web site comply<br>with the provisions of this part, when<br>compliance cannot be accomplished<br>in any other way. The content of the<br>text-only page shall be updated<br>whenever the primary page<br>changes. | N/A       |
| (I) When pages utilize scripting<br>languages to display content, or to<br>create interface elements, the<br>information provided by the script<br>shall be identified with functional<br>text that can be read by Assistive<br>Technology.  | Supports  |
| (m) When a web page requires that<br>an applet, plug-in or other<br>application be present on the client<br>system to interpret page content,<br>the page must provide a link to a<br>plug-in or applet that complies with<br>§1194.21(a) through (I).   | N/A       |
| (n) When electronic forms are designed to be completed on-line,  | Supports  |

| the form shall allow people using<br>Assistive Technology to access the<br>information, field elements, and<br>functionality required for completion<br>and submission of the form,<br>including all directions and cues. |     |
|---|-----|
| (o) A method shall be provided that<br>permits users to skip repetitive<br>navigation links.  | N/A |
| (p) When a timed response is<br>required, the user shall be alerted<br>and given sufficient time to indicate<br>more time is required.  | N/A |
