Cataloging & Authority Control – Alexis Rogers

From I-Cat minutes:

Team members brainstormed the intent of the Authority Control Discussion sessions to be held at the Spring Forum.

CARLI has made the Springer Medicine e-book collection available to all CARLI libraries and the Electronic Resources Team negotiated a good price for the entire Springer e-book package. 11 libraries are purchasing the whole package. Bibliographic records are available for all collections, and CARLI is working to get documentation together, using the Springer e-book records as a model for future e-book record loads. There is a new Work Request Order (WRO) designed for electronic resources that went into production on Feb. 5, 2010. Documentation for using the form will be available within two weeks and at that time Casey will make an announcement about the new WRO. Loading the Medicine records will use one form, with a separate form for the full set of Springer e-books.

CARLI will be moving to a new reporting environment, with Monday, Feb. 22 as the anticipated release date. Although it still will not allow for real-time reporting, the change will significantly shorten the lag time to only 15 minutes. This should help with workflows for reports and using the Strawn tools. The new environment should also prevent the periodic unavailability of the Strawn tools. Libraries will not need to make any changes individually to take advantage of the new environment.
