

CENTRAL DISCOVERY INDEX:AN INTRODUCTION

CARLI

CARLI Alma Primo VE

What is Primo VE Central Discovery Index ? (CDI)

Central Discovery Index (CDI): a database of citations collected from scholarly e-resources including journal articles, e-books, legal documents and more. They are harvested from primary and secondary commercial publishers and aggregators, and from open-access repositories. There are several thousands of sources of over 3 billion CDI citations.

All 91 I-Share Libraries will see in Primo VE the "Everything" and "Articles" search slots. Note: A Discovery or indexing feature (not delivery/Get Full Text per se.)

The screenshot displays the Primo VE search interface. At the top, there are navigation tabs: LIBRARY SEARCH, JOURNAL SEARCH, ILL REQUEST, BROWSE SEARCH, and COLLECTION DISCOVERY. A search bar contains the text "illinois river" with a close button (X) on the right. Below the search bar, there are options: "0 selected", "PAGE 1", "72,289 Results", "Save query" (with a pin icon), and "Personalize" (with a toggle switch). A dropdown menu is open on the right side of the search bar, showing the following options: "Everything" (highlighted with a black arrow pointing down), "Articles", "Library Catalog", "All I-Share Librar...", and "Course Reserves". Below the search bar, the first search result is displayed. It is an article titled "Assessment of otolith chemistry for identifying source environment of fishes in the lower Illinois River, Illinois" by Zeigler, John M; Whittedge, Gregory W. The article is from Hydrobiologia, 2010-01, Vol.638 (1), p.109-119. The article is marked as "PEER REVIEWED".

Example Central Discovery Index (CDI) Search

The screenshot displays a library search interface. At the top, the Quincy University logo is on the left, and navigation links for LIBRARY SEARCH, JOURNAL SEARCH, TAGS, and ILL REQUEST are in the center. On the right, there are icons for a clock, a pin, and a user profile labeled 'Green (CARLI Acco...)'. Below the navigation bar is a search input field containing 'mississippi river|history'. To the right of the input field is a dropdown menu set to 'Everything' and a magnifying glass icon. A black arrow points down to the search button area. Below the search bar, the results section shows '0 selected', 'PAGE 1', '45,015 Results', and options for 'Save query' and 'Personalize'. On the left side, there is a sidebar with the heading 'Tweak your results'. It includes an 'Expand My Results' checkbox, a 'Sort by' dropdown set to 'Relevance', and an 'Availability' section with a dropdown arrow. A black arrow points left to the 'Availability' section. The 'Availability' options are: 'Available online', 'Peer-reviewed Journals', 'Open Access', and 'Held by library'. Below this is a 'Subject' dropdown and an 'Author/Creator' dropdown. The main results area displays three items:

- 1. **BOOK**
Upper Mississippi River history : fact, fiction, legend
Larson, Ron, Captain.
1995
Available at Brenner Library Special Collections of Rare Book and Journals: see library staff for assistance (977 L334u) >
- 2. **BOOK**
Mark Twain's Mississippi : a pictorial history of America's greatest river
Watkins, T. H. (Tom H.), 1936-; Twain, Mark, 1835-1910.
1974
Available at Brenner Library Main Library Collection (Q 917.7 W186m) >
- 3. **ARTICLE**
Rivers, Memory, and Nation-Building: A History of the Volga and Mississippi Rivers by Dorothy Zeisler-Vralsted
Rivers, Memory, and

What can be in your Central Discovery Index ? (CDI)

But what about EBSCOHost e-collections?

What about EBSCO and CDI? :

A different Discovery relationship

- NOT directly include EBSCOHost indexing- hence the EBSCO API search via Primo VE. However, most (not all) of the same journals, conferences, etc. indexed by the EBSCOHost databases are covered by the CDI sources of bibliographic citations.
- For example, the ingested citations from PubMed about "influenza" would overlap with the indexed material in EBSCOHost CINAHL about "influenza".
- Now for **Delivery**: the delivery/View it/link resolver part will link the patron from a citation to the full text as found in EBSCOHost dbs (whether the all CARLI ones or library purchases.) The origin of the citation should not matter as long as there's enough metadata to identify the journal, volume, date, etc.

Delivery – the “link to full text” part of Primo VE from citations.

Features of CDI and Alma

- "Easy Active" setting in Alma so that active eligible e-collections in IZ can automatically send citations to CDI.
- No separate interface as with older "Primo Central Index"
- To make changes need roles electronic inventory operator and CDI inventory operator.
- You can deactivate one or more e-collections sending indexing to CDI. (images on next slide.)

CDI OPTIONS IN ALMA

The screenshot shows the ALMA interface for managing electronic collections. The browser address bar displays the URL: <https://i-share-trn.alma.exlibrisgroup.com/mng/action/home.do?mode=ajax>. The navigation menu includes Acquisitions, Resources, Discovery, Fulfillment, Admin, and Analytics. The search bar shows the query "Scielo" under the "Keywords" filter. The results page displays "Electronic Collections (1 - 3 of 3)" for "Scielo". The collection details for "Scielo" are as follows:

Type: Selective package	In CDI: Yes
Services: Full Text (Available)	CDI Search Rights: Free
Interface name: Scielo	CDI Full Text Rights: OpenAccess
Linking Level: Issue	CDI Full Text Linking: Linkresolver
Creation Date: 02/27/2013 18:00:00 CST	Collection ID: 616040950005894
Modification Date: 02/19/2020 18:14:03 CST	MMS ID: 991462704405894

Additional actions for the collection include "Portfolio List (672)", "Edit Collection", and a menu icon. A blue arrow points to the "Edit Collection" button.

CDI Institution Settings 

We subscribe to only some titles in this collection Yes No

Do not show as Full Text available in CDI even if active in Alma 

Then run job "Publish electronic records to Central Discovery Index" from the Configuration- Discovery Menu. (Note during Test Alma period ask CARLI staff to run this job for your library.)

CDI citations in context and in relation to each other

Relations → context → services

CDI and Alma: a database of citations & relationships between them

Discovery via contextual relations

Books → Book reviews

Books → Book chapters

Book chapters → Other chapters of the same book

Coming later:

Articles → research data

Authors → Other publications by the same author

Journal articles → Other articles of the same journal issue

Formal Data Relations: Contextual

Book --> Book chapter

The screenshot displays a library catalog interface. On the left is a sidebar with navigation options: TOP, SEND TO, GET IT, DETAILS, LINKS, VIRTUAL BROWSE, and TAGS. The main content area shows a book record for "Abraham Lincoln in the post-heroic era: history and memory in late twentieth-century America" by Barry Schwartz (1938-). The book is available at ONL. A menu is open over the book, showing options for "Chapters of this book" and "Book reviews". A "Send to" section includes "READING LIST" and "EXPORT BIBTEX". A modal window titled "Showing chapters for" is overlaid on the right, displaying a list of 9 results. The first two results are book chapters: "Introduction" (Chapter 1) and "Ascension : Lincoln in the Great Depression" (Chapter 2), both published by the University of Chicago Press in 2009. Each chapter entry includes a small book cover icon, the chapter title, publisher information, and a "Full text available" link.
