

Faculty Questions List Chad Kahl presentation March 17, 2017.

Do you have assignments and/or methodologies that might require students to use a makerspace or its technologies/tools?

If so, what are the learning outcomes?

Please describe the assignments.

Are there common characteristics of student population in your **learning/teaching space?**

Would you offer different assignments and/or methodologies if there were different tools available?

What kind of support would you like us to provide to your students?

What level of technical support would you envision?

What level of equipment/tool training (e.g. download file of video camera) would you envision?

What level of project guidance and training (e.g. how to approach producing a three minute video) would you envision?

What kind of support would you like us to provide to help develop your assignments that will make use of the makerspace?

What level of technical support would you envision?

What level of equipment/tool training (e.g. download file of video camera) would you envision?

Who would you want to work with (e.g. librarian, technologist, instructional designer)?

When would you want to get assistance (e.g. point of need, scheduled consultations, workshops)?
