

The Integration of Area and International Studies Digital Collections into CARLI Libraries: Questions of Access and Digitization Criteria

Marek Sroka

University of Illinois Library at Urbana-Champaign

msroka@illinois.edu

UNIVERSITY LIBRARY
UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

Geographic and Subject Coverage of Area Studies Collections

- Many new area studies programs that emphasize collaboration with other Title VI National Resource Centers and more global and comparative perspective bode well for the future of area studies in the increasingly global environment
- This may allow international studies to develop a new and exciting synergy between the study of local and regional issues and the inquiry into global and transnational phenomena (e.g., recent initiatives such as “Worldly Region: Latin America in Global Perspective” and “The Global Informatics Project,” developed by the UIUC area studies centers)

Geographic and Subject Coverage of Area Studies Collections

- Area studies have demonstrated their interdisciplinary nature rooted in rich vernacular resources that allow them to present the non-Western perspective, which is critical to the understanding of different regions and cultures
- This can help to inform the research of global and transnational phenomena as experienced at the level of regional entities
- At the same time an old model of area studies focusing exclusively on one regional entity or even one region is no longer relevant

Geographic and Subject Coverage of Area Studies Collections

- Area studies collections span broad geographic areas and include various regions of the world
- Traditionally, area studies collections include Slavic and East European, African Studies, Latin American and Caribbean Studies, Asian Studies (East Asian and South Asian). Some libraries also include Germanic and Scandinavian Studies collections as part of the area studies collections
- Languages that are covered include: Slavic (e.g. Russian, Polish, Czech, etc.) and East European non-Slavic (e.g. Hungarian, Latvian, Lithuanian, etc.), Asian (CJK, Indian languages, etc.), Romance languages (French, Spanish, Portuguese, Italian), African languages (Swahili, etc).
- Subject coverage is wide and includes language and literature, political science, history, economics, culture, religion, art, science, etc.

Digital International and Area Studies Content in CARLI's Vufind

- HathiTrust and Google Book Digitization
- OCA (Digitized Books from the University of Illinois and Open Content Alliance)
- Digital Content from Foreign Digital Libraries (e.g. Europeana)
- UIUC Digital Content Creation (DCC) (e.g. *Maps of Africa to 1900*-a checklist of maps in atlases and geographical journals in the collections of the University of Illinois, Urbana-Champaign. The index/checklist is digitized and is available through Vufind, but individual (digitized) maps are only available through DCC Web page and Internet searches

Examples of Digitized Titles in CARLI

- Full-text in HathiTrust
- Full-text in foreign digital libraries
- Limited (search-only) copy available in HathiTrust (but the same title may be available as full-text in non-American digital repositories)
- Limited (search-only) option may still be viable to researchers (e.g. for searching archival texts)
- Digitized archival guides in PDF format (e.g. Archives of Ukraine digitized publications)
<http://www.archives.gov.ua/Eng/Publicat/guidebooks.php>

достоинства этих, как пастыри, так и учителя, получив освящающую благодать Духа, и силою чудес и словом благодати просвещали погрешивших и обращали на истинный путь заблудших. Мы же, не получившие ни дара чудес, ни дара учения, ибо страстно к удовольствиям сделали себя недостойными, хотим рассказать об этом немного из переданного нам вышестоящими благодати, приняв на помощь себе Отца и Сына и Святого Духа».

Однако Благодатью Божией творение самого Иоанна из слов и действий, и в то же время, как и в словесном выражении, рождает истину, и в сердце и в разум, и в волю, и в жизнь, и в благодать, и в достоинство преемника великих отцов веры и учения Апостольских. В этом сочинении с кристальной ясностью выражено православное догматическое учение, как оно было выражено к VIII веку и в нем не имеется ни одного отклонения от Правого Вероучения и всякий христианин может с полным доверием свои и чужие мнения проверять учением, выраженным Дамаскиным, и мнение противное дамаскинову считать сомнительным или ошибочным.

К сожалению, дамаскинов труд не охватывает всех догматов Православной Веры (да это, впрочем, и невозможно), касаясь только тех предметов, которые преп. Иоанн считал наиболее важными: Учение о Боге-Троице, о Сотворении Мира и устройении его (здесь даже и естественнонаучные взгляды св. Дамаскина не могут быть обойдены вниманием, поскольку в них выражена верный мировоззренческий взгляд на состав и устройство мира), о природе человека, о Господе Иисусе Христе и совершенном Им спасительном Подвиге, о православных таинствах и обрядах, о различных трудных вопросах, которые встают перед христианами и вопрошающими о Христианской Вере, о последних вещах и

ARL 2011 SPEC Survey on Collecting Global Resources

- For this survey, global resources are defined as print and electronic library materials that are published outside the United States and Canada in any language on any topic. This may include but is not limited to traditional area studies materials, and it is not limited to resources typically associated with the field of Global Studies
- The survey is now closed at the result will be published shortly
- Executive summaries of SPEC surveys are available at no charge online at <http://www.arl.org/resources/pubs/spec/complete.shtml>

ARL 2011 SPEC Survey on Collecting Global Resources

- Please estimate the percentage of electronic (digital and digitized) materials in your library's global collections
- In the next five years do you expect the relative percentage of electronic materials and the expenditures for electronic materials to increase, decrease, or stay about the same?
- "Increase (for LAC): we are considering purchasing a great number of Argentinean books as e-books, if our provider makes them available at a reasonable cost."

Conclusions

- More HathiTrust records need to be uploaded into CARLI
- More links to identified items that have been digitized by foreign digital depositories or libraries need to be added to their print equivalents in our collections
- Beyond OPAC: specialized area studies collections only retrievable through Web searches (but not accessible through our online catalogs)
- [Moving Library Metadata Toward Linked Data: Opportunities Provided by the eXtensible Catalog PDF](#) Jennifer B. Bowen (DCMI Conference Papers) at:
<http://dcpapers.dublincore.org/index.php/pubs/issue/current>
- Semantic Web and linked data example from the British Library at:

- Chapter 8-Internationalization : the global challenge
- This chapter highlights some issues that are involved when making digital libraries available in languages other than English, especially some issues with Chinese and other Asian languages: the so-called CJK (Chinese-Japanese-Korean) family of languages as well as Hindi and other Indic languages that present many interesting problems for character coding that have not yet been entirely solved in Unicode-compliant applications
- The chapter also gives give a comprehensive account of Unicode standard that aims to represent all the characters used in all the world's languages
