

Collection Summaries and Example Bibliographic Records for the Springer eBook Collections (as of 2/15/2010)

This document contains a summary of the descriptions posted by OCLC for each of the eighteen sub-collections that comprise the Springer Complete English/International eBook Collection. Each collection summary includes example bibliographic records, counts of the number of bibs in each individual collection for the initial loads into I-Share library databases, and information at the collection level about the bib record Encoding Level and percentage of records cataloged using Library of Congress subject headings.

The Springer Medicine collection (example 1 below) was purchased on behalf of all CARLI libraries, and the records can be loaded by CARLI staff into the databases of I-Share libraries that request the load. Documentation on the load options and implementation procedures for the Springer Medicine collection is available from <<http://www.carli.illinois.edu/mem-prod/I-Share/cat/SpringerMed.pdf>>

The remaining collections described in this document are available only to the libraries that opted to purchase the Springer Complete English/International eBook Collection.

It should be noted that CARLI staff have performed some pre-load processing on all of the Springer records to improve data quality, so it is possible that the example records included in this document may vary from what the same record looks like when viewed via WorldCat. The examples in this document are copies of the records ready for loading into I-Share databases, before any library-specific customizations have been applied.

Table of Contents

1. Springer Medicine	2
2. Springer Architecture and Design	4
3. Springer Behavioral Science	7
4. Springer Biomedical and Life Sciences.....	9
5. Springer BSL Healthcare Collection	12
6. Springer Business and Economics.....	14
7. Springer Chemistry and Materials Science	16
8. Springer Computer Science	19
9. Springer Earth and Environmental Science.....	22
10. Springer Engineering.....	26
11. Springer Humanities, Social Sciences and Law	28
12. Springer Lecture Notes in Computer Science	30
13. Springer Lecture Notes in Mathematics	33
14. Springer Lecture Notes in Physics.....	35
15. Springer Mathematics and Statistics.....	38
16. Springer Medicine Dutch Language.....	40
17. Springer Physics and Astronomy	42
18. Springer Professional and Applied Computing	44

Available to all CARLI libraries:

1. Collection name: Springer Medicine (SPMED)

Cataloged by: **OCLC**

Cataloging status: **Ongoing**

Number of titles (as of 1/6/2010): **1580 Records**

Subject headings: **99% subject analysis using LC subject headings**

Level of cataloging: **99% of the cataloging is level I**

Example bibs:

(NOTE: the “|” character in the indicator positions in the examples represent a blank space. These records do not include a pipe character in the indicators.)

520 || \$a"In an age when climate change is of key international concern, this work is both timely and important. The articles collected here are the result of a NATO workshop which brought together an extraordinary number of scientists. The attention is focused on the Mediterranean area which, like others around the globe, is facing its own particular climate stresses due to the chemical, biological and land characteristics of the region. Water shortages coupled with air pollution create unique stresses, due to the area's location and emissions. In North Africa, the problems associated with the season

nal distribution of water, leading to chronic shortages, is exacerbated by air pollution due to emissions in the region and those transported from its global neighbors. This volume details the findings of experts from North Africa and Mediterranean Europe, and in particular describes the influence of chemical emissions and climate transformation. It also looks to the future, addressing the problems associated with the growth of multiple stresses in the region, brought about by human activity and the rapid advance of industrialization.

12. Collection name: Springer Lecture Notes in Computer Science (CSQ)

Cataloged by: **University of California, San Diego**

Cataloging status: **Ongoing**

Number of titles (as of 11/3/2009): **1559 Records**

Subject headings: **99% subject analysis using LC subject headings**

Level of cataloging: **53% of the cataloging is level 4**

NOTE: Most records in this collection are cataloged using the single-record approach. The existence and location of the electronic item is noted in the existing print version record. Records beginning with the November 2009 update are for the separate electronic version of the work.

NOTE 2: In the files received from OCLC, this file had over two thousand records that represented pre-2005 imprints. In addition, this file had duplicate records when compared with the Springer Computer Science file. As a result, CARLI's pre-load processing included removal of pre-2005 imprints as well as the duplicate records from this file. Therefore, the number of records listed above for this collection is far lower than the count on OCLC's web page for this collection.
