10:17:57 From Holly Nordheden : What was the point of the 780/785 section? It's standard periodical cataloging

10:18:53 From Denise Green : Please mute unless ready to ask a question.

10:19:41 From Holly Nordheden : Wonder if the 773 linking would have useful implications for Reserves?

10:21:14 From Mary Konkel : While there was an example of an OCLC number in the \$w 773, there was no mention of OCLC at all

10:21:51 From Mary Konkel : And "specialists" that know what a 505 is are called "catalogers" :)

10:23:35 From Michael A Norman : Yes, I need to digest the non-use of Host Bib Records and rather use a main title record. We have lots of Hoist Bib Records.

10:23:39 From Jodi Craiglow : Right, Mary?? That's just automatic for me!

10:25:03 From Denise Green : Similar to a collection of scholarly essays with only 1 or a few by your campus authors.

10:25:59 From Mary Konkel : These "journal article" bibs should reside in our IZs, correct?

10:29:24 From Michael A Norman : Good points. Yes, need to consider impact on network zone record. And, if you entered in 773/774 fields those could get overlaid by subsequent version of record too.

10:30:40 From Mary Konkel : Probably wouldn't catalog a bound on a single record if the content of the individual bound volumes were distinct and needed the subject and other access points, especially true with films

10:31:03 From Eric Neagle : I also didn't like that the Primo display showed the non-'main' titles as part of the main title, which isn't exactly true. They are bound together which isn't really the same.

10:31:22 From Michael A Norman : Yes, those would need to be local extensions really. Could not move this information into the 9XX fields to have similar effect as 773.774.

10:36:04 From Michael A Norman : Can local fields (9XX or others I guess) become clickable in display (to perform additional search).

10:36:30 From Holly Nordheden : Does that job include 780/785 too or just the 77X?

10:39:45 From Michael A Norman : I wish for those 776 fields it would key off subfield w (or x) rather than perform another title search when it pushes to Advance Search. I don't know if we have any control over that.

10:43:20 From Michael A Norman : Let me see if I can find some examples.

10:48:01 From Holly Nordheden : So if I add the new bibliographic record for a serial title change with a 780, I'll have to wait until the next day to see the relationship in PrimoVE? And only if we own both titles and I replace the older title with a fresh copy including the new 785

10:56:19 From Mary Konkel : THANKS!

10:56:30 From Cynthia : Thank you!

10:56:32 From Michael A Norman : Yes. Very good. Thanks for the info. Have a great rest of the day!

10:56:49 From Marcella Nowak : Thank you.

10:57:08 From Holly Nordheden : There's no additional configurations Carli would need to do if we used the 77X to link articles or chapters for reserves?

10:59:07 From Holly Nordheden : Thanks. Always helpful to have the Consortia viewpoint since not usually covered in these ExLibris sessions
