

The optional link to library-specific request hints will display at the bottom of the VuFind request form, in both the local and the union catalogs. The same linking text will display in several different contexts, as the user proceeds through the requesting process. See illustrations below:

Request
Item

Sorry, although this item is available in the library it is not requestable. [Possible reasons.](#)

An item can be unrequestable if:

There is something special about the item, such as being shelved in a location where items are kept for in-library use only, or being in a format that cannot be sent through the library's delivery system.

There is something special about the requester, such as being in a category of borrowers who do not have requesting privileges, or being "blocked" from requesting because of a specific problem with the user account.

Things to try:

Visit the library to use the item there, or expand your search to identify another item that might be requestable.

Check [your account](#) to see if you have any overdue items or owe any fines. Contact a [library staff member](#) for more information.
