

Voyager 9.0 Release Resolved Issues

Ex Libris Confidential

This Excel file contains a list of all the issues that were resolved for the Voyager 9.0 release March 2014.

See the **List of Resolved Issues** worksheet.

General documentation for this release:

<http://www.customercenter.exlibrisgroup.com>

Ex Libris Confidential		
Summary	Release Notes Comments	Component/s
ACQ rte 9 when copy a vendor code then click on Other Charges	Minor Windows timing adjustment.	Acquisitions
ANA: Cross Join Error when use ELink query subject	Elink query subject should no longer cause a Cross Join Error in query studio when combined with other namespaces (Bib, MFHD, Item)	Analyzer
ANA: Cross Join Error when use query subject Item Barcode	Created relationships between the Item Barcode query subject and other query subjects (AllCharges, Archived Charges, Outstanding Charges) within the Charge Transactions namespace within the Presentation Layer to prevent crossjoin errors between those query subjects	Analyzer
ANA: Filtering with Type in Values does not work with Cataloging Package MFHD Location filters	Working correctly in 9.0.	Analyzer
ANA: MFHD Update Date filter does not provide date range in Query Studio	Fixed the following query items in the MFHD Record query subject in the presentation layer in order to display correct date range prompts. MFHD Create Date MFHD Update Date MFHD Export OK Date MFHD Export Date	Analyzer
ANA: Report Studio 8.X in Firefox gives "404 - Not Found"	Cognos 10.2.1 resolves issues with Firefox browser	Analyzer
ANA: Unable to filter by Bib Medium	Updated the cataloging model to allow proper filter prompt for Bib_Medium in the Bib Medium presentation layer.	Analyzer

ANA: prompting does not work in Query Studio for Cataloging package	Catalog Package query items updated within various namespaces in the presentation layer to improve prompting at the reporting level (Query/Report Studio)	Analyzer
Acq: Shortcuts to open Bindery Maintenance not working	New Complex Publication Pattern erroneously contained two short cut keys: b and P: b conflicted with Bindery Maintenance and P would have conflicted with New Publication Pattern had it not have been captured by the b first. The solution was to leave B for Bindery Maintenance, leave P for Publication Pattern and change the short cut key for New Complex Publication Pattern to x.	Acquisitions
BULK: Barcode added to incorrect records	Clear out the bulk import item barcode from the processing of previous record when processing the next record	Bulk Import
BULK: BulkImport only deletes first holdings record	When invoking bulkimport with -r (delete MFHD) option, skip the MFHD can't delete because of attachement and delete the next MFHD. When the system is read only or other than attachment failure (e.g. database error), the delete will not continue to next one. Note that load MFHD (-m) and delete MFHD (-r) option can't not be issued together per existing logic. Therefore, the existing logic for load MFHD will not be changed. In load MFHD's attempt of deleting MFHD prior to loading MFHD, if there is an error of deleting a MFHD, the load MFHD operation will not continue.	Bulk Import, Cataloging
Blank pop up charge note results in error	Working correctly in 9.0.	Media Scheduling

CAT/WebV : Content Limit does not find valid records	Use the limit passed in from client to process carrier, content, and media limit	Cataloging, OPAC
CAT: "Print Selected" prints MFHD Loc instead of Item Perm Loc	Fix was to use the item permanent location in the printing code instead of the holding location when printing the item details.	Cataloging
CAT: Overlaying brief with full bib causes record to not be found in limit	Solution: Update the limit mapping as if there was no previous bibliographic record. Treat this limit map update as a new addition.	Cataloging, OPAC
CAT: copying a heading from Browse Headings Search copies the last heading copied to the clipboard	Clear the clipboard before loading it up with new data from the headings browse results.	Cataloging
CAT: default item type doesn't allow reset to blank to force it to pull it from SysAdmin	Allow the user to set the "Item Type" on the "Item Defaults" tab of the "Session Defaults and Preferences" dialog to empty, as can already be done for other "Item Defaults". If that "Item Type" is empty, then use the "Initial Item Type" for the location in the Cataloging Policy in SysAdmin.	Cataloging
CAT: space between delimiter & subfield causes subfield to disappear	A subfield delimiter followed by a blank now triggers a validation error provided the MARC Validation option is in effect.	Cataloging
CAT:"Enum"&"Chron" replaces actual numeric values when re-sequencing item records	If the user clicks in the area below the last row as the target of the move, the last row is implied.	Cataloging
CAT:"unable to add this record" message when attempting to update authority record	Cannot be replicated.	Cataloging
CIRC: Clicking proxy patron barcode elipsis gives RTE 440 and 381	This feature is working correctly in 9.0.	Circulation
CIRC: Item sort shows information for wrong item	The correct information now displays for each selected item selected after a re-sort has been performed by clicking on the column header.	Circulation

CIRC: Patron SSNs display in "multiple patrons" from "Charge screen"	Check SSN display security before showing the SSN when multiple patrons have the same barcode and the operator must choose one from the list.	Circulation
CIRC:charging an item with an existing administrative hold does not warn operator	Fixed as a part of the Voyager 9 project "Hold should create block to prevent item from being charged to another patron".	Circulation
Cat: Byte 32 no longer changing to correct value in Unicode for auth rec	A new Authority control dll ensures that the value "n" is placed in byte 32 of the 008 of a newly created authority record if the latter is for a 110 or 710 heading overriding any value present in the template if one is used. If no template is used, "n" being the default value, is placed in that position. The new dll is version 3.2.0.147.	Cataloging
Details tab - data entered does not display in Patron Record List	Working as designed.	Circulation
GDC: Scan to Exclude does not add records to set	Working as designed.	GDC
INDEX: 654H LAN index has invalid subfield	Corrected the 654H indexrules by removing the x subfield.	Indexing/Regen, Various
Index on Authority 377 field has been defined incorrectly	Updates the index rules from SR=a to S+=a1 as specified. Note if the A77A was previously defined by a customer, the upgrade script will log the previous definition for troubleshooting later.	Indexing/Regen
InterCirc/NCIP unable to process item barcodes containing special characters	Do not normalize the item barcode (which strips the special character) prior to using the item barcode to retrieve item data from the item_barcode table.	NCIP, Voyager InterCirc

MEDIA: Incorrect availability when booking is Charged but not Scheduled	Check charged status first to determine if the item is available or not	Media Scheduling, Z39.50
MS: Cannot modify bookings	This is working correctly in 9.0.	Media Scheduling
MS: an overlapping booking should show the date of the conflicting booking and not the last date entered	Use the date/time of the booking that had a conflict with another booking when displaying the error message.	Media Scheduling
MS: if a media item is in a booking with others, it still shows as scheduled after discharge	This is working correctly in 9.0.	Media Scheduling
MS:Bookings sort incorrectly by end date	A "date" property had to be applied to the end date column to allow it to sort correctly.	Media Scheduling
MS:Database Media Error when try to book item with Lost status	This is working correctly in 9.0. The appropriate warning is displayed and the operator may choose to proceed or to cancel adding the media item.	Media Scheduling
MS:Media scheduling crashes when calendar has 12:0x AM start time	Added logic to handle times between 12:00 and 12:09 AM in the calendar.	Media Scheduling
MS:Schedule Monitor-Conflict Resolution & Warning has information for all bookings currently charged and not for bookings with potential upcoming conflicts	This works correctly in 9.0.	Media Scheduling
MS:cannot edit an equipment serial number which was created with more than 15 characters	This was fixed in an earlier release.	Media Scheduling
MS:rte 381 invalid array or property index error message when deleting equipment from search	Cannot replicate in 9.0.	Media Scheduling
MS:view only operator cannot see full details of media item on booking	The Media Items display on the Media tab of a booking, need not be disabled just because the operator has view only permissions. All the information about the item is now viewable by using the horizontal scrollbar.	Media Scheduling

MS:view/add/update bookings can also cancel/delete	The correct permission is now checked to enable/disable the delete/cancel buttons on the toolbar of the booking form.	Media Scheduling
Media Booking Equipment Inventory Reports : default list/replacement price is wrong	Format the equipment value before writing it to the inventory report.	Media Scheduling, Various
Media:boolean searching does not retrieve results.	Boolean searching is now working correctly.	Media Scheduling, Various
Modify Due Date Time defaults to AM Between 12:00PM and 1:00PM	Fixed in the client.	Circulation
ODBC : BIB_ID data type inconsistent	The bib_id data type is now consistent with the definition of bib_id in other tables.	Prepackaged Access Reports
ODBC:New tables not linked to VoyagerTables in reports.mdb	Fixed as part of a Voyager 9 project.	Prepackaged Access Reports
Patron Update (XML) is adding Expire and Purge dates with midnight date stamp	Use the current date time (hour, minute, and second) to add to the import expire and purge date to import patron record in the database.	XML Patron Update
Pick and Scan: if a location name is made up of dashes only, the permanent location id of the item is set to 0	Modified the way in which the controls are loaded.	Various
SA: Error when updating IP ranges in Access Control groups	This is working correctly in 9.0.	System Administration
SA: Initial Default Item Type uses previous location	A default item type is required. If a Cataloging Policy location does not have a default item type when selected in Sysadmin, the user will be warned when opening the policy and the item type dropdown will not have anything selected for that location. The user will not be permitted to save such policy until a default has been selected. When selecting locations for a new policy, the dropdown will default to the first item type as per current functionality.	Cataloging, System Administration

SA:save button not active for databases with underscore characters	An underscore is not allowed in the database code field and the user is prevented from typing it in.	System Administration
SEARCH: Suppressed MFHD not indicated in Holdings Index	Check a holdings specific flag for suppression when displaying a holdings result set.	Cataloging
Tomcat Webvoyage does not display multiple 006 fields.	Display multiple 006 and 007 fields for display, print, and export	Various
UB / RESTful API: stub patron data deleted on renewal	Pass patron info through RESTful API to create stub record correctly with patron type code and last name.	Universal Borrowing
Voy/Primo: Requests timeout on large number of items	<p>Modify patron request code to implement a "hierarchy of needs", since VWEBV needs lots of information about requests, and OvP needs much less, and how much less also depends on whether OvP is displaying URL links to requests, or sufficient data to create a patron request from Primo. This fix takes care of the slowness of the Record resource services when there are many items and patron data is included in the service call. A previous fix covered the patron request services themselves.</p> <p>No configuration or file changes.</p>	OvP
Voyager 8.2 API documentation for SysAdmin is incomplete	Add missing return for UpdAcqGpLoc. Update return code for AddLoc and UpdLoc for location code already existed and location name already existed.	API, Documentation, System Administration
WebAdmin: Circjob 44 runs for all patron groups only	Restored ability to select patron group.	WebAdmin
WebVoyage: Item locs differing from mfhd loc don't always display	Update retrieve item locations logic to not always assume the first item will share MFHD location.	OPAC

WebVoyage: Some headings do not appear at all in WebVoyage browse	Removed some bad logic.	WebVoyage
cat:byte 11 changing from MESH to LCSH for authorities	If a template is being used to create an authority record, the values in the 008 of the resulting record will be those of the template. A new authority control dll is required.	Cataloging
catjob: could not retrieve heading.heading_type and job stops	Changed the error reporting process for heading_types so that a missing heading_type is logged but does not terminate reports 1-4. Optimized the SQL queries in jobs 1-4 to improve the efficiency of gathering data and speed up the reporting.	Catjob
circ:Keyword Holding Boolean search does not retrieve items	Corrected the column number used to retrieve the MFHD id from the selected title.	Circulation
circ:patron address edit hot key duplicated	Corrected a short cut key on the patron address tab to be unique for that tab.	Circulation
