

## Voyager 9.1.1 Release Notes

Ex Libris Confidential

This Excel file contains a list of the enhancements and resolved issues for the April 2015 Voyager 9.1.1 release.

Refer to:

- \* 9.1.1 Enhancements
- \* Resolved Issues

### General documentation for this release:

<http://www.customercenter.exlibrisgroup.com>

Purpose	Description	Implementation Notes	Related Documentation
Support for RHEL 7	Voyager 9.1.1 has been certified to run on Red Hat Enterprise Linux version 7.		For details, see <i>Supported Software and PC Requirements</i> on the Ex Libris Customer Center.
Tag Table updates	The MARC 21 tag tables have been updated with changes listed in MARC 21 Update 18 (April 2014) and MARC 21 Update 19 (October 2014).	The following files were also updated in the top-level TagTable folder: <i>Bmarcfix.cfg</i> , <i>Country.cfg</i> , and <i>Lang.cfg</i> .	<a href="http://www.loc.gov/marc/status.html">http://www.loc.gov/marc/status.html</a>
Tag Table updates	The OCLC tag tables have been updated with changes listed in OCLC Technical Bulletin 263 (May 2014) and OCLC Technical Bulletin 264 (August 2014).	The following files were also updated in the top-level TagTable folder: <i>Bmarcfix.cfg</i> , <i>Country.cfg</i> , and <i>Lang.cfg</i> .	<a href="http://www.oclc.org/support/documentation/technicalbulletins.en.html">http://www.oclc.org/support/documentation/technicalbulletins.en.html</a>

Summary	Release Notes Comments	Component/s	Key
cat: editing 150 \$v to x does not queue auth for ghc	Allow changing only the subfield code and not the contents to trigger a global heading change on an authority record.	Cataloging, Global Headings Change	<a href="#">VYG-4234</a>
acq:can save invoice w/o Invoice Number	Disable save buttons by default. Also move other disabling events up to occur earlier.	Acquisitions	<a href="#">VYG-4460</a>
BURSAR: Sometimes patron fine/fee do not update	Check for errors on all database transactions. Some may have been missed while getting patron fines and posting patron fines.	Circjob	<a href="#">VYG-4545</a>
VOY: script run_acct.ksh in /m1/utility errors	The problem was corrected by using a slightly different logic.	Various	<a href="#">VYG-4579</a>
Acq: unable to edit approved line item with multiple copies	Resolved selection issues in copy/fund tree, so that all changes are applied to the correct copy.	Acquisitions	<a href="#">VYG-4581</a>
WebV/CAT: Command searches on Chinese words made up of several characters fail	Allow non-ASCII characters to be grouped in a search argument. This allows characters that are words to be grouped with other characters to form longer words.	OPAC	<a href="#">VYG-4645</a>
ARS/WEBV: Request form displays for all patron groups	Filter out system form with ARS for all patron groups when displaying the request forms. The patron group that is allowed to make the ARS request still displays.	ARS	<a href="#">VYG-4658</a>
100 character comment limit not enforced via OPAC	Set a max length on the comment field of the form to keep the comment at 100 characters or less.	Circulation, OPAC, WebVoyage	<a href="#">VYG-4858</a>
Barcoding serials causes premature close if barcode entered with scanner	The Close button is no longer the default so pressing Enter after entering a barcode will no longer warn that a modification has been made. The user may choose to save the item or use the Close button.	Acquisitions	<a href="#">VYG-4872</a>

Summary	Release Notes Comments	Component/s	Key
8.2.2 data dictionary formatted incorrectly	Data dictionary formatted into one column to prevent unexpected breaks in database table definitions.	Prepackaged Access Reports	<a href="#">VYG-4877</a>
Bibs with many holdings not showing the bib data.	Allow enough memory space for the locations associated with holdings when creating the query that sorts the locations for display.	OPAC	<a href="#">VYG-5219</a>
GHC: Message not specific when change fails for valid reason	If a bib heading or authority heading is not found when catjob 13 is run to change those headings according to the modified 1XX authority heading, no error message will be printed to the log so as not to confuse users. A "not found" condition is ignored.	Global Headings Change	<a href="#">VYG-5269</a>
WebV: Pickup Location drop-down disappears in Chrome	Fixed a problem in the javascript based calendar that was preventing the Chrome browser from displaying the form drop-downs in the form that displays after the calendar was activated.	OPAC	<a href="#">VYG-5279</a>
CAT/WebV: 880 subfield 6 not searchable	All unpaired 880 fields can be found via any of their subfields either using GKEY or an appropriately-defined keyword index.	Cataloging, OPAC, WebVoyage	<a href="#">VYG-5331</a>
Unauthenticated Local File Read (WebAdmin's displayfile.cgi)	Limit file access to any file under the \$VOYAGER/\$DATABASE directory.	WebAdmin	<a href="#">VYG-5360</a>
Documentation for JavaMelody Configuration		Documentation	<a href="#">VYG-5503</a>
Call number redirect builds incorrect link	Use CALL+ for call number browse.	OPAC	<a href="#">VYG-5623</a>
WEBV: Staff view page help link displays wrong help page.	The correct help is now displayed for Staff View.	OPAC, WebVoyage	<a href="#">VYG-5813</a>
WEBV: Links using non-numeric characters in the bib ID prevent further searches until browser cache is cleared	The Holding Info and Get Related Bib Count web services must verify that the bib id is numeric before sending it to the query.	OPAC, WebVoyage	<a href="#">VYG-5859</a>

Summary	Release Notes Comments	Component/s	Key
Webadmin bulk imports create compressed log file that cannot be opened with built-in Windows utilities	Fixed issue where zip files were created with gzip, causing reports of issues with opening the compressed logfile with stock Windows operating system.	Bulk Import, WebAdmin	<a href="#">VYG-5886</a>
WEBV: Diacritics in component names do not display in WebVoyage	WebVoyage will display any character entered and displayed in ACQ client.	OPAC, WebVoyage	<a href="#">VYG-5903</a>
UB: Request form not available if local db not selected	The UB Request availability in WebVoyage will be determined based on the databases searched by the patron and the databases made available by the library.	OvP, Universal Borrowing, WebVoyage	<a href="#">VYG-5959</a>
Closed Calendar with no end date gives RTE 65099 at Charge attempt	Return an "invalid calendar" error to the client when there is no exception and the library is always closed.	Circulation, System Administration	<a href="#">VYG-6017</a>
CAT: Create Auth on 100/240 with 880 pair from Authority Validation freezes Cataloging	New Authority Control dll is required. The name is AuthorityCreation2009.11-151.dll.	Cataloging	<a href="#">VYG-6058</a>
CIRC/SYS: "Outstanding Fines" inaccessible when "Restrict Record View" checked regardless of restricted patron groups	Mask the patron's name and password in the fine fee display for a patron who is in the restricted patron group of the operator circulation profile.	Circulation, System Administration	<a href="#">VYG-6089</a>
CIRC: Duplicate Patron displays incorrect Name Type if changed	Problem does not occur in 9.1.	Circulation	<a href="#">VYG-6169</a>
GDC: Preview "Jump Ahead" fails with RTE 65099/440 on large jumps	Fixed problem that caused PREVIEW_RECORD_SET API to fail when jumping large distances in large record sets.	GDC	<a href="#">VYG-6240</a>
MS: Day View gives "Database Media Error!" if no 245 in bib	Allow retrieval of items with no title for displaying in day view, search bookings, conflict resolution, and item list in conflict resolution.	Media Scheduling	<a href="#">VYG-6250</a>
Search History not working in Classic WebVoyage / Web Cataloging	Fixed issue preventing search history for working properly in classic WebVoyage and WebCat.	WebCat, WebVoyage	<a href="#">VYG-6257</a>

Summary	Release Notes Comments	Component/s	Key
CAT: Auto-populated fields for authority records from 8xx fields missing NUC	The NUC code is now correctly added to the 64X fields of a newly created authority record when the bibliographic record contains a 8XX field.	Cataloging	<a href="#">VYG-6269</a>
Circjob 30 stops if accrued fine for patron in policy with due date prior to calendar start	Let the accrued fine/demerit job continue after an error while logging each error that occurs while adding fines or demerits.	Circjob, Circulation	<a href="#">VYG-6316</a>
UB/CIRC: Edit button active in patron requests window for UB requests	Correct the test for local versus remote database requests. Only local database requests can be edited.	Circulation, Universal Borrowing	<a href="#">VYG-6363</a>
CallSlip continuously sends pages to the printer when a single word is longer than a line	Fixed printing routine which determines how much text can fit on a line to accommodate strings that do not contain spaces.	Callslip	<a href="#">VYG-6364</a>
CIRC:item counters not updated when put in transit for hold requests	Update item hold/recall placed counts correctly for duplicate items when one of the items goes to the "in transit on hold" status for a title level request. Update circjob 6 to properly update item hold/recall counts for administrative requests. Provide a clean up script to reset the inconsistent item hold/recall placed counts.	Circulation	<a href="#">VYG-6378</a>
vxws: returns "null" in AVA tag subfield a instead of value from PrimoExp.ini	Retrieve the institution id stored in the PrimoExp stanza as a final resort if none of system properties have it.	VXWS	<a href="#">VYG-6393</a>
Edit button grayed out for Holds and Recalls in Patron Request window	Correct the test for local versus remote database requests. Only local database requests can be edited.	Circulation	<a href="#">VYG-6394</a>
Update PrimoExp*.ini to delete deprecated DelMFHDSImpFileBase=delete.imp	Remove the deprecated delete.imp reference in Primo.Exp*.ini file, including the one in vxws/ini directory.	Primo Extract	<a href="#">VYG-6402</a>

Summary	Release Notes Comments	Component/s	Key
UB: clicking the UB request form link results in no items available message even though item is available	Transforming the key from the cluster@dbkey format to dbkey caused corruption of the dbkey. That problem is fixed.	Universal Borrowing	<a href="#">VYG-6494</a>
SDI emailed search URL's Improperly formatted date limits	Populate yearOpt, fromYear, toYear on the search URL to indicate year option is chosen.	OPAC, OPACjob	<a href="#">VYG-5228</a>
Doc: SMS messages truncated by Simplewire SMS Proxy	The <i>SMS Gateway/Service Providers</i> section of the Circulation guide was updated to include more vendor-specific information related to message size.	Documentation, SMS Gateway	<a href="#">VYG-6331</a>
vxws/Clusters : Unable to place hold requests when cluster_id <> 1	This issue has been corrected.	Circulation	<a href="#">VYG-6561</a>
