Based on Feedback Sheet by Dr. Will Thalheimer

Original Assessment: 5 Things Learned in the Library Sessions.

This was done after the students had returned to their home classroom after the two library sessions. The classroom instructor asked the students to write down 5 things they learned in the library sessions. Having the students do the assessment a few days or a week after they had the library sessions allows you to look at the "stickiness" of the concepts covered in the library sessions.

Communication 103 assessment handed out by classroom instructor: (one library session)

**What are three things that you learned during the library session?**

**What is one thing you would have liked to have learned?**

**Any other comments?**

## Recommended Reading List

X Things Learned is a variant of the One-Minute Paper assessment and the Pellegrino article gives a good overview of what information the assessments give.

Pellegrino, Catherine. "But What Did They Learn? What Classroom Assessment Can Tell You about Student Learning." *Brick and Click Libraries*(2010).
