Controlled Digital Lending: A Discussion
CDL Survey – CARLI Public Services Committee released in Dec. 2021

SPARC defines controlled digital lending as:

Rooted in the fair use right of US Copyright Act, CDL is the digital equivalent of traditional physical library lending—a library can digitize a book it owns and lend out a secured digital version to one user at a time, in place of the physical item.

Controlled Digital Lending has three important core principles:
1. A library must own a legal copy of the physical book, by purchase or via donation or gift;
2. A library must maintain an “owned to loaned” ratio, simultaneously lending no more copies than it legally owns; and,
3. A library must use technical measures to ensure that the digital file cannot be copied or redistributed
Has your library used Controlled Digital Lending (CDL)?
